About me

Solid knowledge of HTML, CSS, JavaScript, and React. Mastering new technologies gives me a lot of satisfaction.

I am focused on improving my skills in the field of front-end technology. I want to create scalable and well-documented dry code. I enjoy working collaboratively but can also run with projects on my own.

Below you will find short description of projects that I've completed. If you want see them there is a hiperlink on the left side.

EXPERIENCE

1. One Page Portfolio git
React with SCSS Styling

- This project is a short description about my experience.
- Creating site fully styled and responsive. In this project You can find link to the other two projects.
- Site is deployed on netlify and has respositories on bitbucket and github.

2. Multi-Page Quiz git
React with using advanced hooks

- Complex web site which is using react. It is fully responsive and it using npm like react-router or react-beautiful-dnd.
- Despite five different categories by using Context, code is kept dry.
- Site is also deployed on netlify.

3. One Page SecondPortfolio git
React with Typescript

- The project mange state by using Context and Redux.
- Thanks to Typescript this project is much more immune to mistakes.
- The SCSS is based on BEM methodology.
